ABOUT FATBOY

Fatboy redefines the boundaries of everyday design. What began with the iconic beanbag has grown into a comprehensive collection of contemporary furniture, lighting, and accessories for both indoor and outdoor living. From modular sofas to lighting and durable garden pieces, each Fatboy design is playful yet refined, inventive yet unmistakably recognizable as a Fatboy product.

Our approach to design is rooted in creativity, comfort, and quality. We create products that invite you to slow down, connect, and enjoy the spaces you live in, whether indoors or out. Together with our internal design team and a network of designers who share our belief in creating timeless design, we shape collections filled with thoughtful details and refined craftsmanship. Every design is a pleasure to look at and to live with, balancing form and function with ease.

At Fatboy, we believe great design should be loved, cared for, and last for years to come. That's why we design with circular principles in mind. Our products are made from durable, high-quality materials and are easy to repair, maintain, and renew. Built with modular components, every piece can evolve with you over time. Because longevity is always a sustainable choice.

FATBOY'S FABRICS

CAN I TOUCH IT?

OUR FABRICS

Choosing your favorite fabric can be hard and that's why we're here to help. Fatboy uses natural and synthetic fabrics. The natural fabrics are made of 100% natural yarns, like the stonewashed fabrics. Generally, natural fabrics are not made for outdoor use as they are sensitive to UV radiation, (salty or chlorinated) water, and bleach. Top-quality outdoor materials must be stainproof, waterproof, and UV and mold-resistant. That's why our outdoor products are produced from materials made of 100% synthetic yarns and fibers. All these materials are weatherproof and can be used outdoors all year round.

So what distinguishes one fabric from another? To explain, we've made a list of the main properties of all the different fibers.

DESIGNED TO LAST

At Fatboy, we believe good design is made to be loved, cared for, and to last for years. That's why we design with circular principles in mind. Wherever possible, we choose recycled materials without compromising on quality.

Our products are made from high-quality materials and designed so you can keep using them, repairing them, and adapting them. Does your taste or interior change, then interchangeable covers let you effortlessly give your design a new look. And if something breaks, you simply replace a part instead of buying a whole new item.

WITH RECYCLED MATERIALS

With every product, we look at how we can make conscious choices without compromising on design, quality, and comfort. Wasting less and reusing smartly are key principles. Wherever possible, we reduce material use and work with recycled materials.

The Attackle Sofa and the Concrete Seat are good examples. These products are made entirely from recycled materials and produced in the Netherlands. They are strong enough to last for years and designed with efficient material use in mind. We don't only do this for new products. Existing designs are also regularly updated with more sustainable materials.

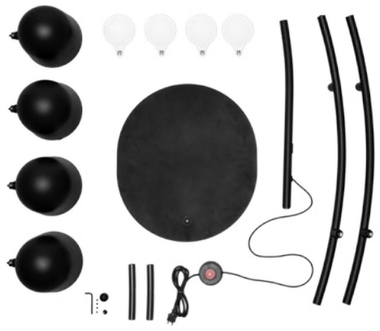

HIGH QUALITY

High quality is the foundation of products that last. We extensively test our designs for comfort, stability, and durability, so they can handle intensive daily use. We don’t only do this for new products. Existing designs are continuously improved as well, for example by upgrading materials. That’s how we make sure design is not only beautiful, but also reliable and made to be enjoyed for years.

CIRCULAR DESIGN

Circular design means that we already look ahead to the future at the very first design stage. How do we make sure a product lasts a long time, is easy to maintain, and can be adapted when needed?

REPAIR KITS

This circular way of designing makes repairs easy. If something needs replacing over time, our repair kits allow you to replace individual parts without having to buy a completely new product.

SUMO SOFA

The Sumo Sofa design sofa is a great example of designing with a circular mindset. Nothing in the sofa is glued, and it consists of separate components. This allows you to expand or reconfigure it at any time. One day a loveseat in the reading corner, the next day a generous corner sofa in the living room. The covers are also interchangeable, so you can give the Sumo Sofa a new look whenever you feel like a different color or fabric. And if you ever say goodbye to it, you can fully disassemble the sofa and recycle all its parts.

ORIGINAL OUTFITS

Making sure a product lasts as long as possible is an important part of our design process. That’s why many of our products have interchangeable covers. The Original Outfits are a great example. By simply replacing the cover of your beanbag, you give it a new look or turn an indoor beanbag into an outdoor version. This way, you don’t have to buy a new beanbag right away when your taste or use changes.
